

# LEED Canada for Homes: Program Review

## DESCRIPTION

This full-day workshop provides essential knowledge of the Leadership in Energy and Environmental Design (LEED) Canada for Homes rating system. It provides the foundation required for more advanced LEED Canada for Homes training. Group activities help demonstrate and reinforce learning. This workshop is available in English and French.

Note: This workshop, like all the CaGBC education programs, meets eligibility requirements for the Green Associate exam.

## TARGET AUDIENCE

The target audience for this workshop is individuals seeking a better understanding of LEED Canada for Homes. This may include: home builders, interior designers, contractors, architects, project managers, developers, product manufacturers, real estate managers, owners and tenants, consultants and industry stakeholders. Individuals studying for the LEED AP with Homes credential may find this a useful workshop to attend as part of their study plan.

## LEARNING OBJECTIVES

- Explain the characteristics of green homes and LEED® Homes
- Navigate the scorecard and certification process
- Identify roles and responsibilities
- Manage the costs associated with obtaining LEED Canada for Homes certification

## LEVEL / CEUs

Level 200. 7 GBCI CE hours

## COST
